*The Linux Users' Group of Davis presents:*

DVD Authoring
with Linux

Presented by O'Reilly & Associate author
Kyle Rankin

Numerous powerful tools exist for Linux to encode video, author DVD content, and burn it onto a disc. However, due to the complexity of the process, using them can be difficult.
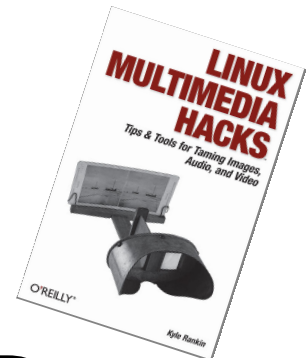

Today, user-friendly front-end tools exist which simplyify the process. Kyle will discuss the issues, tools, and demonstrate the process of creating a video DVD under Linux.

Monday, March 20th
6:30pm - 9:00pm

Davis Library
315 East 14th St.

Kyle Rankin is a system administrator for Quinstreet, Inc., and is the current president of the North Bay Linux Users Group in Sebastopol.

He is the author of O'Reilly & Associates' *Knoppix Hacks*, *Knoppix Pocket Reference* and *Linux Multimedia Hacks*.
