

The *Linux Users' Group of Davis*
presents:

REvolution R

Monday
November 16, 2009
7pm – 9pm

Explorit Science Center
3141 5th Street
Davis, CA 95616

The **R programming language** is a software environment for statistical computing and graphics. It has become a de facto standard among statisticians for the development of statistical software, and is widely used for statistical software development and data analysis.

REvolution Computing offers open source products and services for high performance analytics, including "*REvolution R Enterprise*," an optimized version of R with parallel processing capabilities.

David Smith is Director of Community at *REvolution Computing* in San Francisco.

Isaac Finnegan helped package *REvolution R* for the *Ubuntu* distribution of Linux.

Free & open to the public!
