

The Linux Users' Group of Davis presents:

A professional photographer's view of Linux

Presented by Wes Hardaker,
Captured on Earth Photography

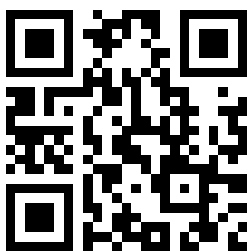

Wes Hardaker, owner of Captured On Earth Photography, has been an avid user of Linux for decades, and will share his workflow and tool options while developing new images under his primary Linux desktop. He'll discuss pros and cons of the choices he's made along the way, as well as the missing pieces he wished would be filled faster.

About the Speaker:

Left to his own devices, Wes would spend all of his time wandering the trails that roam through the mountains and wilderness, stopping frequently to snap pictures of nature's best creations. Captured on Earth Photography embodies Wes' collection of the most beautiful and interesting sights that he's been privileged to visit.

Monday, August 18, 2014
7:00pm – 9:00pm
Free & open to the public

Davis Public Library
Blanchard meeting room
315 East 14th Street
