The Linux Users' Group of Davis presents:

Siafoo

share code and programming experience

Stou Sandalski & David Isaacson

Siafoo is dedicated to **sharing code and programming experience** and learning from what others have shared. Siafoo is here to make coding less frustrating and to save you time. Siafoo's purpose is to be somewhere between a full-fledged source control system and the directory on your hard drive containing all your useful scripts and snippets. It was created because a decent amount of time was wasted in trying to find boiler plate examples and utility functions buried inside large projects, reinventing the proverbial wheel, and tracking down solutions to obscure bugs on random forums and blogs.

Siafoo runs on a totally open source stack: Linux, Apache, PostgreSQL and Python, and was created by Stou Sandalski and David Isaacson, recent graduates of UC Davis.

Monday, August 18th, 7:00pm
Davis Public Library
315 East 14th Street, Davis

Free and open to the public. Please join us!
