

The *Linux Users' Group of Davis* presents:

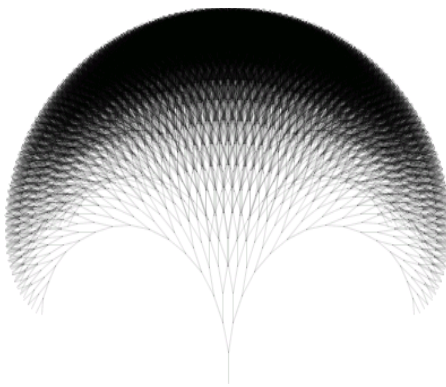

PROCESSING

an **open source programming language** and environment for people who want to create **images, animations, and interactions.**

Initially developed to serve as a software sketchbook and to teach fundamentals of computer programming within a visual context, *Processing* also has evolved into a tool for generating finished professional work.

Today, there are tens of thousands of **students, artists, designers, researchers, and hobbyists** who use *Processing* for learning, prototyping, and production.

Monday, January 16th

7:00pm – 9:00pm

Free & open to the public

www.LUGOD.org

Veterans' Memorial Center

Club room

203 East 14th Street

Davis, California

LUGOD is also celebrating *13 years* serving the Davis area!

Join us for free **food, cake, and give-away prizes** from

ThinkGeek and *O'Reilly Media*!
