

What has **ORACLE** been doing to **Linux**!?

The Linux Users' Group of Davis presents:
Todd Trichler, Senior Principal Product Manager,
Oracle Technology Network

“Linux Engineering Update”

Oracle Technology Network will present some of the work being done by Oracle's *Linux Engineering Team* in the areas of: clustering, data integrity, virtualization and Linux stability and performance. For each area, following questions will be considered: Why are these improvements important? What is being done? Where to next?

There will also be a demonstration of *Oracle VM Server*, a GPL'd Xen-based server virtualization environment.

Join us for a pizza party after the meeting,
courtesy of Oracle Technology Network.
(At 'a place of [our] choosing.')

Monday, May 18th

7pm – 9pm

Free! Open to the public!
